

SHIP & SHORE

...your source for Innovative Equipment,
Expert Advice and Incomparable Service.

www.shipandshore.com.au

Product Portfolio

Storage And Handling Equipment

- Internal floating roofs, geodesic\domed roofs, tank roof seals
- Floating suctions, floating skimmers, drains and ventilation systems for floating roofs
- Chemical handling solutions including top loading arms, platforms and overflow prevention

Marine loading Arms and hoses

- Marine loading arms, QCDC,s ERC's, MLA trolleys for all liquids including Ammonia and LNG
- Large diameter (up to 16"), high performance marine transfer hoses including LNG applications
- Hose towers and hose reels for chemical applications or where MLA's are not an option due to space restrictions or number of products loaded

Ship Access Systems

- Tower type access - height-adjustable lift platform with telescopic gangway
- Column type access - fixed height platform with telescopic gangway
- Riding ladders - when you have more space on your jetty
- Optional full covered walkways which are sheltered from the elements
- Cranes, davits and fire monitors are available as well as lighting, gates and security systems

Custody Transfer Systems

- All kinds of metering specialising in LNG, off and on-shore
- Automated in-line blending and filtering
- SCADA and HMI Control systems
- Automated Quality Analysis, eg.chromatograph systems
- Consulting, engineering, manufacture, commissioning and training

Bitumen processing and loading

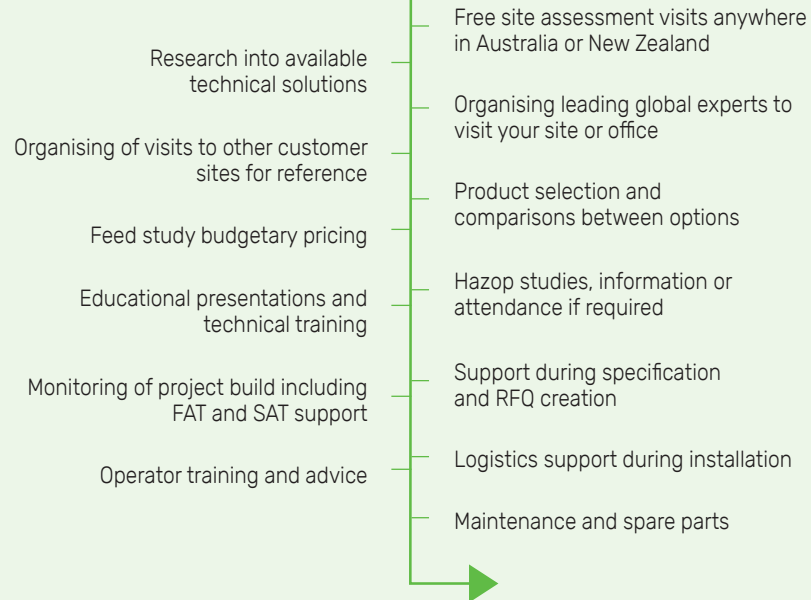

- Bitumen laboratories for emulsion, PMB and crumb rubber asphalt
- Emulsion batch and inline plant, budget and fully automated models available
- Containerised, fully automated PMB and crumb rubber processing plant
- Up to 60 tonne/hour capacity
- Full unloading and loading capability
- Tanks, dispensing, metering and blending
- Colloidal Shear Mills

How does SHIP & SHORE add value to your project?

SHIP & SHORE are committed to opening and maintaining a reliable communication channel and giving excellent technical support for a relatively narrow range of products. SHIP & SHORE can assist you with:

Representing

SHIP & SHORE act as an agent for leading global manufacturers of marine based products for loading of ships and terminal storage. We only work with companies who understand our concept of service and whole of life value. Manufacturers who have chosen SHIP & SHORE to represent them in Australia and NZ include:

KANON LOADING SYSTEMS are the fastest growing Marine Loading Arm manufacturer in the world.

AN MLA that out performs all others in every feature from lowest pressure drop to smoothest movement control and zero moment on the jetty.

Customers keep coming back to Kanon for the benefits that their designs deliver.

Talk to SHIP & SHORE about Kanon Top loading arm and platform packages for specialist chemical applications.

VERHOEF ACCESS TECHNOLOGY is the global leader in ship's access systems.

With over 80 years experience and over 1000 units in 70 countries, Verhoef has a range of standardised designs which are adapted to your specific needs.

Verhoef is an aluminium fabrication specialist with a legendary reputation in bulk loading terminals for coal, wheat and hydrocarbons including LNG, oil and gas.

Talk to SHIP & SHORE about the benefits of safe ship access today.

GUTTELING has a remarkable attitude to quality and yet provide consistently excellent value for money across the widest range of Lloyds certified composite ship hoses available – 12" to 16" diameter hoses are available up to 20m lengths, 10" and lower diameters are available in up to 30m.

Gutteling service is second to none, with capacity to meet extremely short lead times if required.

Talk to SHIP & SHORE today about the benefits of Gutteling Composite hoses and handling equipment.

CTS are a well-established supplier of floating and domed roofs for hydrocarbon storage.

With a wide variety of patents and highly developed engineering knowledge, CTS has some unique and very elegant solutions to your liquids storage challenges.

The secret to longevity and low maintenance in storage tank roofs is in the understanding of how tanks operate. This results in highly detailed installation and operational solutions that you do not achieve from any other supplier.

GGS are an independent supplier of turnkey solutions for custody transfer of gas including LNG. GGS has a wealth of experience in both offshore and onshore metering systems. Belgium based, GGS has a reputation for gaining a deep understanding of the end-user requirement and creating innovative designs that out-perform all others in terms of best technical solution and overall price. Since 2006 GGS has repeatedly partnered with hundreds of clients, from South East Asia to the USA, to create an enviable record of on-time projects and after sales support.
